Description

Document Description

The International Commercial Invoice is an administrative document which contains all the information about the international sale. The item, quantity, price for the products/services sold, delivery and payment conditions, as well as the taxes and other expenses that might be included

in the sale, are detailed in an International Commercial Invoice.

The importer, with the original of the International Commercial Invoice, declares to the tax authority of his country the amount that it must pay, to who it is going to pay and the agreed means of payment. For the exporter, this document means a documentary evidence of the sales that it has made in foreign markets.

In operations with third countries, the International Commercial Invoice is part of the customs declaration, upon which, the taxes and tariff rights applied, must be paid at the moment at which the products enter the country. In operations with EC countries, this document is used as a declaration of the transaction and tax exemption to comply with the basic tax settlement conditions.

Who Should Purchase this Document

The International Commercial Invoice Guide is helpful for anyone involved in international trade, including: exporters, importers, distributors, traders and brokers, logistics professionals, forwarding agents, shipping lines, airlines, and international trucking firms. This guide is also helpful to trade associations, chambers of commerce, consultants, professors and students of international trade.
